1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Election/Restrictions

- | | |
|-----------|---|
| Group I | Claims 1-6 and 10 are drawn to a recombinant protein comprising peptides from two or more stages in a life cycle of <i>Plasmodium falciparum</i> , wherein each peptide comprises an antigenic epitope. |
| Group II | Claims 7-8 are drawn to an isolated nucleic acid molecule encoding the protein of claim 1. |
| Group III | Claim 9 is drawn to a method of enhancing an immune response of an animal to <i>Plasmodium falciparum</i> comprising administration to the animal an effective amount of a protein composition comprising the recombinant protein of claim 1 and a pharmaceutically acceptable carrier. |
| Group IV | Claim 11 is drawn to antibodies that are immunoreactive to the recombinant protein of claim 1. |
| Group V | Claim 12 is drawn to a method of using the antibodies for simultaneous detection or measurement of peptides derived from two or more stages in a lifecycle of <i>Plasmodium falciparum</i> . |

Art Unit: 1645

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I and Group III lacks novelty under PCT Article 33(2) as being anticipated by Gilbert et al (*Nature Biotechnology*, Volume 15 November 1997, p. 1280-1284).

Gilbert et al discloses a recombinant protein that carry a string of up to 15 defined cytotoxic T lymphocyte (CTL) epitopes from *Plasmodium falciparum*. Gilbert et al also teach that the recombinant protein have been shown to generate CTL responses in mice when injected via several different routes without adjuvant (see entire article).

Group I is the main invention in this application and it lacks novelty, therefore the other claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept.
